Software Engineering Intern - Angular

This opportunity is not as regular internship, physical presence in workplace is not required so we term it **"Virtual Internship"**. You will be working in the team remotely. Assistance and guidance required will be provided. This position is ideal for an undergraduate or graduate student looking for semester-long internships to gain experience and earn academic credits.

This internship will be for Open Learning Exchange (OLE) International. OLE is a non-profit organization which works in the sector of education. It has been working in many under-developed/developing countries like Kenya, Ghana, Nepal, Somalia, Uganda, Syria, and more. You can look more about OLE in its website https://www.ole.org.

Where we come in

We are supporting the development of learning platform for OLE International from Nepal, you can call us as Nepal Dev Team (NDT). You can reach out development community of OLE for any guidance along with that NDT team will be there to provide physical assistance if required.

What you will achieve

- You will get chance to contribute educational project that will be deployed over many countries including Nepal and impact life of many students out there.
- You will improve your portfolio, skill set and get to work on team as part of community.
- Any support required for academic credit during internship period, such as enrollment letter & evaluation will be provided from NDT.
- After completion of internship you will get letter from OLE Internship stating your internship.
- If you want to continue with NDT and NDT finds you as a good candidate, NDT can provide you employment offer as well.

When to start

ASAP
